

PlasmaTact

Cold Plasma Antimicrobial Technology

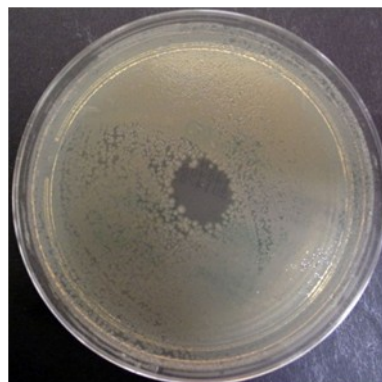

Key Points:

- Safe product
- Gas plasma (Argon / Helium)
- Environmentally friendly
- Proven anti-microbial efficacy
- Low (35~40°C) Temperature
- Microwave powered
- Portable, Easy to use
- No wastes products to dispose of
- Made in the UK
- Qualified UK based support

Possible Applications

- Laboratories / Research
- Food processing / packaging
- Sterilization of hard to clean areas
- Medical / Veterinary

Plasma, more specifically non-thermal atmospheric plasma is an exciting emerging technology; one which we're very passionate about at Adtec.

Since 2005, we have been heavily involved in research into plasma physics and specifically its antimicrobial properties. Our microwave generated argon cold plasma technology has been used in clinical trials to treat wounds on human patients, from which we have gained valuable insights and results.
